Wastedocket Bugs

This is for wastedocket.ie. we created this website. it has business that adds drivers. it has both business and driver. it has a website ... responsive as well as ios/android mobile app. i need a bunch of bug fixes/enhancements in it.

You should register account as business as well as add driver... driver accept the business.. its all free trial so you can try everything to learn the website

issue	what to do	status
See small issue identified on screenshot below. Collection time of docket is always 12.00 am. Creation time seems to be correct. It also only appears to happen for this driver. Have not seen it on any other dockets.		

Add edit the Business email address option	- user can add another email. - send otp to that email - enter otp - if verified then change successfully	
Can we provide an option for more than one admin email. I have a user that will have 4-5 admin looking to access the system.	add multiple admin emails You will need to make changes in schema to add this concept. You will also need to add frontend in business where user can add multiple admin emails to the same business.	
Can the time and date be separated into their own column on the exported spreadsheet to make it easier to search. 	separate date/time	
Would it be possible to set up an automated download of data - exported spreadsheet and dockets from the previous day. Ajay suggested that it may be possible to have a zip file emailed to the admin email every night? This would add to efficiency for the user. Could this just automatically happen or have an opt in option?	add agendajob for sending email of report every day we have agendajobs in the backend. So this will be another agendajob	

In the Finance Section, could we list the number of drivers registered to each user so I can confirm that they are on the right subscription? **WASTE DOCKET** — Home · Dockets · Business · Facility · Customers · Drivers · Account · Plans · Suggestions · Admin · All Logs · Help — Sign Ou **Finance** | Customer	Plan	Actions

Toddy Cuthbert	No invoice yet	$ | Prev Page 1 of 2 Next 10 ⌄	add in this page	
Driver needs to be able to edit the tonnage figure once he gets to the destination facility and they only get an exact weight figure there. Can it be editable, the same way that the destination facility signature is.		
Can the driver signature be remembered? Once they sign it, it should autosign the signature unless they wish to amend it. This will only be for the driver signature. This will increase efficiency.	cache the last signature	
The admin view is still showing the oldest dockets first. Can this be amended to show the newest dockets at the top of the page?	show newest first	

See below notification that the Business trial has ended. How do I extend this trial period for customers please?	extend trial period date	
Stripe is still not working as far as I am aware. This is critical as I cannot charge without this.	stripe does not work for 3D signature credit card check	

How to build wastedocket?

1. Frontend

https://gitlab.com/secomind/waste-docket/waste-docket-frontend.git

We only do npm ci
node 18 is used for frontend
must run prettier
must run eslint
eslint/prettier you can set in your IDE
Frontend needs .env
Frontend on localhost you can run with "localhost backend" or "staging backend". We do not allow running with production.

npm ci
npm run build
npm run dev

here is the .env for frontend

```
JWT_SECRET=f3a47a83-450a-4362-9ec8-27f810c1ce81
JWT_ACCESS_TOKEN_SECRET=f3a47a83-450a-4362-9ec8-27f810c1ce81
SEND_GRID_API_KEY=SG.4yw5A8y1QiK_RFdQCt7MHQ.E1CnzdKm-VLTf05GlrDlYLAthezFpBpbr
W0t83IKjbQ
BACKEND_API_KEY=5f287595-0937-41c3-a3ef-287878701b4e
EMAIL_FROM=hello@wastedocket.ie
NEXT_PUBLIC_GRAPHQL_URL=https://stageapi.wastedocket.ie/graphql
#NEXT_PUBLIC_GRAPHQL_URL=http://localhost:3300/graphql
# Stripe
NEXT_PUBLIC_STRIPE_TEST_PUBLISHABLE_KEY=pk_test_51OJZ5lDT37JCixB8wrl2PNFXzAe
wMcFLOP0U0V4fX4YDrmgr4GZLd2OmImujrU9e4IOWrgsHsfFzIJ43cxwxffMm009xYyoV0u
NEXT_PUBLIC_STRIPE_PRODUCTION_PUBLISHABLE_KEY=pk_live_51OJZ5lDT37JCixB85MO
NI7zfY29QuVle8O40numHjABYUHODc2sC9xltlPnGlxnniUIMYTNiG06GTE0zFP4PDAFu00rfmB5Qb
h
NEXT_PUBLIC_STRIPE_MODE=production
```

You will change the highlighted NEXT_PUBLIC_GRAPHQL_URL to run with local backend
Otherwise it runs with staging.

2. Backend

We only do npm ci
node 18 is used for frontend
must run prettier
must run eslint
eslint/prettier you can set in your IDE
Backend does not need .env
Backend on localhost runs with staging mongodb. We do not allow running with mongo db production.

npm ci
npm run build
npm run dev:hot

3. Coding

Create your branch.
Do all testing on localhost/staging.
Show me video/in zoom call demo.
Then issue merge request. I will merge.
